

C&M D2K™ SIZE CHART

Economical & Versatile

The 3-Strap and 4-Strap Collars require three and four straps, respectively. If your application permits, the 6-Strap and 8-Strap Collars allow for less straps per collar than possible. For instance, only three straps may be required utilizing a 6-Strap collar, and only four straps may be required utilizing the 8-Strap collar. Straps are often eliminated to allow for grout tube lines. Using fewer straps also reduces unit cost.

4-Strap Centralizer: 2 collars and 4 Straps per assembly
